

297mm

210mm

IMPORTANT INFORMATION

- Please read the instructions carefully before you start assembling to ensure you have all the components listed on the instructions.
- It is much easier to assemble with 2 people
- You should only require a flat headed screwdriver and a rubber mallet

BE CAREFUL WHEN ASSEMBLING

- Take care not to stretch or lift awkwardly
- Make sure the floor is level
- Use of protective gloves and footwear are recommended
- Please consider the environment when disposing of all packaging

WARNING

- Do not stand or climb on the shelves
- Not suitable for use in damp or wet conditions
- Never lean any objects such as ladders or steps against the shelves
- It is recommended that the units are fixed to the wall for safety
- Never exceed the maximum UDL loadings

Gloves recommended

Ensure floor is even

Distribute levels evenly

Do not use in a damp or humid environment

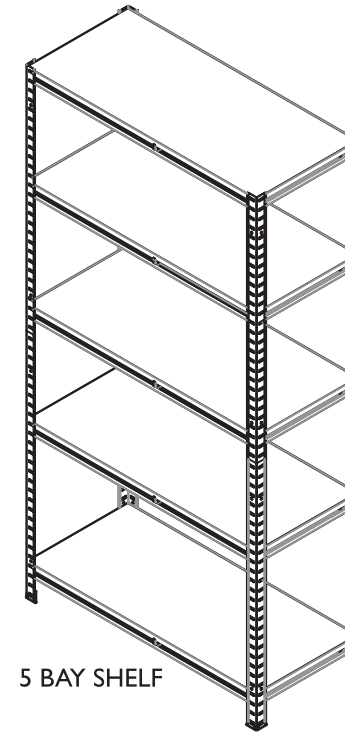

Distribute weight uniformly

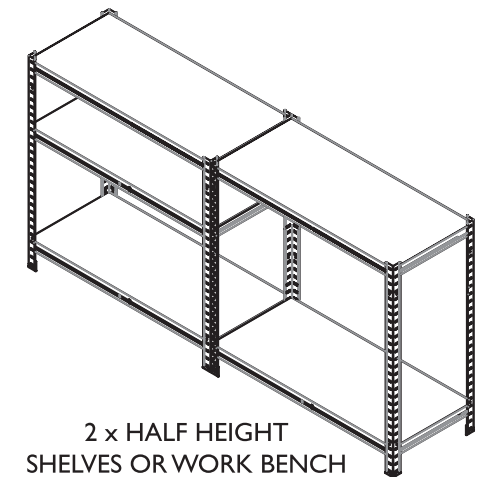

Do not use defective componentry

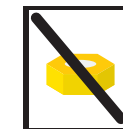

MULTI - FUNCTIONAL BOLTLESS SHELVING

5 BAY SHELF

2 x HALF HEIGHT SHELVES OR WORK BENCH

NO NUTS

NO BOLTS

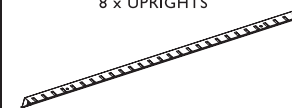

JUST TAP TOGETHER

COMPONENT CHECK LIST

10 x FRONT & BACK BEAMS

8 x UPRIGHTS

10 x SIDE BEAMS

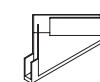

5 x SUPPORT BEAMS

4 x CONNECTORS

8 x FEET

5 x DECKS

ALSO MAKES

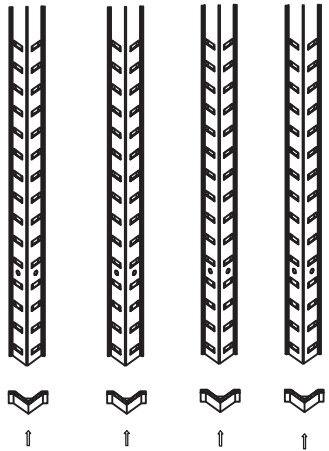

2 x Work Benches
2 x Corner Units

If you are assembling as a workbenches follow all instructions but don't use connectors to make second tier.

ASSEMBLY INSTRUCTIONS

PLEASE READ OUTER LEAFTLET FIRST & TAKE CARE WHEN CONSTRUCTING

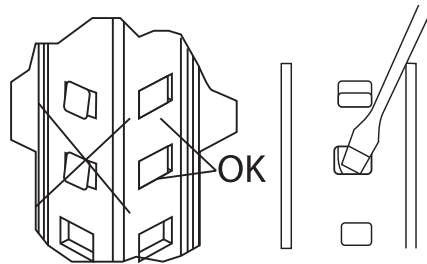

1

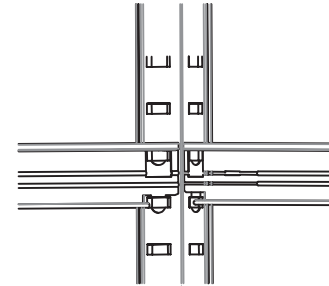

Fit the plastic feet to each of the 4 uprights. You will have 4 spare feet if it is used as a single bay as this product can also make two workbenches.

2

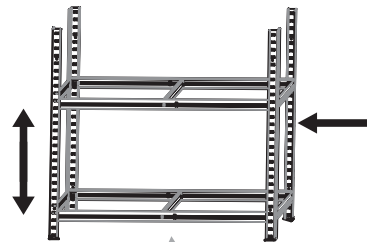

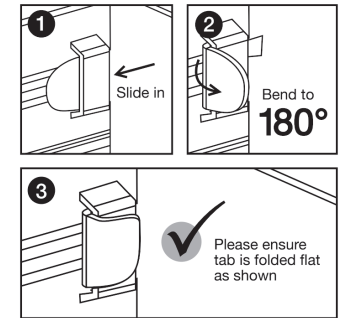

Please read all illustrations in this stage before starting.

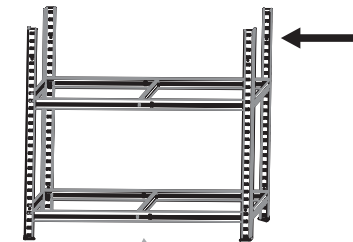

When inserting the tabs into the slots you may need a screwdriver to guide them into place.

With the tabs correctly positioned tap them gently with a mallet until they are firmly in place.

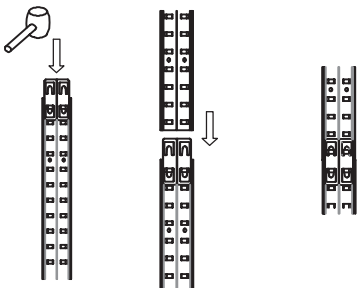

When deciding the distance between the beams ensure it is sufficient to be able to insert the decks. The decks can be inserted from the side of the unit.

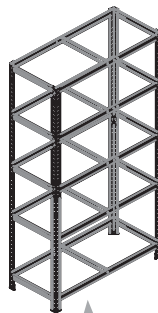

Once you have built the two shelf levels prepare to insert the second upright. Please note you cannot set the 2nd shelf at the top of the upright as the upright connectors use the top slot when connecting the 2nd upright.

3

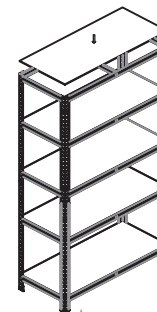

Insert the connectors into the uprights making sure the tabs go correctly into the slots.

4

Each level should now be complete with 2x side beams 2x front/back beams and a centre support beam. Ensure the support beams are folded as per step 2.

5

Insert the decks onto each level - the decks can be inserted from the side if the levels are close together.

6

Please recycle your packaging responsibly.
